MAIN APPLIED EVALUATION METHODS						
INDICATION OF THE EVALUATION METHODS APPLIED BY THE INSTITUTION						
* Application of the evaluation methods provided for in the "Chart of Accounts of Credit Institutions" which came into force on 01/01/2000.						
* Non-Performing Loans (NPLs) on the clients are accounted for and valued in accordance with current banking regulations.						
The main provisions applied can be summarized as follows :						
- Non-Performing Loans (NPLs) are, depending on the degree of risk, classified as pre-doubtful, doubtful or compromised loans.						
- Non-Performing Loans (NPLs) are, after deduction of the guarantee rates provided for by the regulations in force (Circular Letter No. 25/G/97, Circulars No. 19/G/2002 and 38/G/2004), provisioned for :						
- 20% for pre-doubtful loans,						
- 50% for doubtful loans,						
- 100% for compromised loans.						
* Intangible and tangible fixed assets are recorded in the balance sheet at cost less accumulated amortization, calculated on a straight-line basis over estimated lifespan.						
Intangible and tangible fixed assets are amortized according to the regulations in force.						
* The summary statements are presented in accordance with the provisions of the Chart of Accounts of Credit Institutions.						

STATUS OF EXEMPTIONS		
INDICATIONS OF EXEMPTIONS	JUSTIFICATIONS FOR EXEMPTIONS	INFLUENCE OF EXEMPTIONS ON PATRIMONY, FINANCIAL SITUATION AND RESULTS
I. Exemptions from fundamental accounting principles	NONE

GLOBAL RISK MANAGEMENT MECHANISM

1. Integrated Risk Management

1.1 Risk Management Control and Governance Principles

The governance of risk management at the Fonds d'Equipeement Communal is based on :

- the Board of Directors' commitment to prioritizing risk management ;
- the strong involvement of the entire Institution's management in the process ;
- clearly defined procedures and responsibilities within the organization ;
- the allocation of appropriate resources for risk management and the development of risk sensitivity among all stakeholders.

1.2 Structure and Governance of Risk Management

Governance and risk management are ensured by the bodies described below :

Administrative Body

The Board of Directors is chaired by the Head of Government or by the Government Authority delegated by him for this purpose.

It also includes the following members :

- 2 representatives of the Ministry of the Interior ;
- 2 representatives of the Ministry of the Economy, Finance and Administration Reform ;
- 1 representative of the Ministry of Health ;
- 1 representative of the Ministry of Equipment, Transport, Logistics and Water ;
- 1 representative of the Ministry of Energy, Mines and the Environment ;
- the General Manager of the Caisse de Dépôt et de Gestion ;
- members representing elected officials : 8 communal councilors appointed from among the communal councilors appearing on a list drawn up for this purpose.

The Board of Directors meets when convened by its Chairman as often as the needs of the FEC require and at least twice a year.

The Government Commissioner appointed to the FEC, in accordance with the texts in force, attends the meetings of the Board of Directors in an advisory capacity.

Audit and Risk Committee

The Board of Directors is assisted by an Audit and Risk Committee (ARC), in accordance with legal and regulatory provisions, relating to the internal control of credit institutions.

The Audit and Risk Committee includes, in addition to the General Manager of the Caisse de Dépôt et de Gestion, Chairman :

- the Wali, Inspector General of Territorial Administration (Ministry of the Interior) ;
- the Director of the Treasury and External Finances (Ministry of the Economy, Finance and Administration Reform).

The Audit and Risk Committee is responsible in particular for assessing the quality of the internal control system and the consistency of the risk measurement, monitoring and control systems.

Governing Body

The General Management of the FEC evaluates the effectiveness of the risk management process and conducts a regular review of policies, strategies and key initiatives in terms of risk management.

The General Management makes presentations to the Audit and Risk Committee, emanating from the Board of Directors, on the main aspects and major changes in the risk management strategy. The ARC reports on its work regularly to the Board of Directors at each of its meetings.

Credit Committee

The Credit Committee is responsible for reviewing and granting loans under the conditions set by the Board of Directors.

The FEC's Credit Committee includes, in addition to the General Manager of the FEC, Chairman :

- 2 representatives appointed by the Ministry of the Interior ;
- 2 representatives appointed by the Ministry of the Economy, Finance and Administration Reform ;
- 1 representative appointed by the Caisse de Dépôt et de Gestion.

The Credit Committee meet when convened by its Chairman as often as necessary and at least once a month.

Internal Risk Committee

The Internal Risk Committee, chaired by the Governor, General Manager of the FEC, is responsible in particular for :

- validating the overall risk management strategy of the FEC and ensuring its implementation ;
- validating the formal risk management procedures by verifying their compliance with regulatory requirements ;
- monitoring and evaluating the risk prevention measures implemented by the FEC ;
- ensuring the implementation of the recommendations of the Audit and Risk Committee and those of the external control stakeholders in terms of risk prevention ;
- examining the information relating to risk management and ensuring its reliability, before it is transmitted to third parties.

ALCO Committee

The ALCO Committee, chaired by the Governor, General Manager of the FEC, is in charge of :

- developing and implementing the bank's Asset-Liability management policy, in its various components (refinancing, investment, transformation, hedging, Return On Equity (ROE)...), in accordance with the strategic orientations of the Board of Directors and the legislative and regulatory provisions ;
- assessing the pricing policy applied to customers ;
- defining the limits necessary for managing interest rate and liquidity risks ;
- monitoring the Bank's balance sheet balances ;
- assessing the impact of the launch of new products, or any new activity involving an interest rate risk or liquidity risk, on the Bank's financial situation ;
- monitoring the Bank's risk profile (liquidity, interest rate and foreign exchange risk) according to the internal and regulatory limits set by the Bank ;
- validating the conventions and the rate flow methods.

Risks and Permanent Control Division

The Risks and Permanent Control Division is responsible in particular for ensuring the reliability and security of operations carried out by the FEC as well as the implementation of effective processes for measuring, controlling and monitoring risks.

Internal Audit

Internal Audit is responsible for audit operations relating to the organization, procedures and operation of the FEC.

This entity ensures the performance of audit assignments as well as the preparation and follow-up of the meetings of the Audit and Risk Committee.

Internal Audit is also responsible for providing the necessary assistance to external control stakeholders and monitoring the implementation of their recommendations.

Compliance function

The Compliance function is responsible for monitoring the compliance of operations and acts of the FEC with regard to the legal and regulatory provisions applicable to the FEC.

It is also responsible for implementing and monitoring the code of ethics applicable to FEC's staff.

2. Risk exposure

The risks associated with the activities of the Fonds d'Equipeement Communal are as follows :

Credit risk : the risk that a counterparty may not be able to honor its contractual obligations.

Liquidity risk : refers to the risk that the FEC will not be able to meet liquidity demands and meet its obligations as they become due. Requests for liquidity may arise upon maturity of a debt and as a result of a credit agreement.

Interest rate risk : Interest rate risk is the effect that fluctuations in interest rates could have on the FEC's margins, revenues and economic value.

Operational risks : risk of losses resulting from deficiencies or failures due to procedures, human resources, internal systems or external events.

Non-compliance risk : corresponds to the risk of an institution's exposure to a risk of reputation, financial loss or sanctions due to non-compliance with legal and regulatory provisions, standards and practices applicable to its activities or codes of conduct.

Currency risk : due to fluctuations in exchange rates.

2.1 Credit Risk

The FEC is exposed to credit risk due to its lending activity.

General loan policy

The FEC requires its clients to self-finance at least 20% of the investment cost, except for justified exceptions approved by the Credit Committee.

The rates applied are either fixed rates or revisable rates.

The FEC's loans are repaid in annual installments, comprising principal and interest.

Decision-making

The Risk and Permanent Control Division is responsible for approving the project to be financed and assessing the level of risk involved by the granting of the new loan as well as the client's ability to carry out his project.

The Credit Committee decides on the granting of the loan. The latter is authorized by a joint decree signed by the Ministers of the Interior and the Economy, Finance and Administration Reform.

Credit risk management process

Upon receipt of a request for financing a project and depending on its size, the Operations' Pole carries out the evaluation of the project and analyzes the client's financial quality.

The evaluation of the project to be financed is based on an in-depth knowledge of the client, the nature of the investment to be made and the financial package put in place.

The analysis of the client's financial situation covers the budgetary data of the budget execution balance sheets for the last three years, and the approved relative budgets as well as the data of the current year's provisional budget.

A retrospective analysis is first established in order to identify the trends in the main budget headings of the Territorial Community.

Secondly, a prospective analysis is carried out on the basis of the trends observed in order to measure, over time, the evolution of the Territorial Community's borrowing capacity.

The calculation of the borrowing capacity incorporates the following principles :

- the repayment capacity of the Community depends on the level of savings generated ;
- the maximum savings convertible into an annuity must not exceed 80% of the gross savings ;
- the maximum debt ratio must not exceed 40%, unless expressly waived by the Board of Directors. Prior to any loan approval, the Risk and Permanent Control Division is responsible for assessing the level of risk involved in the granting of the new loan based on:
- Analysis of the content of the client file: general and legal data, financial and technical data.
- The analysis of the retrospective and prospective financial situation of the client, which allows to determine the intrinsic financial quality of the latter and to assess various debt and solvency ratios as well as self-financing capacity.
- The assessment of the quality of the client based on the background of repayments of loans already contracted and the situation of its arrears regarding the FEC.
- The Assessment of project evaluation based on commonly accepted technical ratios by type of project.
- The Assessment of the need to match the loan to be granted to the provision of guarantees and proposal of risk correction measures to be implemented.

General conditions for granting loans

As with the other debts of the Territorial Communities, the FEC's loan annuities are accompanied by the legal requirement of obligation in their budgets.

The FEC's loan contracts provide for :

- a suspension clause for disbursements in the event of a deterioration in the borrower's financial situation;
- a suspensive clause for disbursements in the event of late payment exceeding 30 days.

Solvency profile

At the end of December 2021 :

The weighted net risks borne by the FEC reached 7,049,010 thousand MAD and consist of 84% of credit risk and 16% of operational risk.

In compliance with prudential requirements, the solvency ratio reached 75.45%, while the Tier One ratio reached 61.26%, thus reflecting the good level of solvency of the Institution.

Analysis of the credit portfolio

Receivables from customers, consisting of 99.84% of commitments for the benefit of Territorial Communities, have totalled 26,190,008 thousand MAD at December 31, 2021.

The financing commitments given by the FEC in favor of the clientele amounted, on December 31, 2021 to 5,556,371 thousand MAD.

The analysis of the situation of off-balance sheet commitments as of December 31, 2021, shows that 63.08% of the overall volume corresponds to recent loans committed for less than 3 years.

Provisions, provisioning policy and credit risk coverage

The Accounting & Reporting Division is responsible for the process of classifying and provisioning non-performing loans.

Receivables from Territorial Communities are assigned a weighting rate of 20%.

The classification and provisioning policy complies with the provisions of Bank Al-Maghrib Circular No. 19/G/2002.

Risk Division Coefficient

The FEC constantly monitors compliance with the maximum ratio of 20% between the total risks incurred on the same client and its equity.

As part of financing requests, the operating entities as well as the Risk and Permanent Control Division ensure compliance with the risk division coefficient, which is also monitored by the Accounting and Reporting Division.

According to the terms of Bank Al-Maghrib's new Circular No. 08/G/2012 (entered into force in 2013), the risk division coefficient is established at 12.03% at the end of December 2021, falling below the regulatory threshold set by BAM.

Pursuant to Bank Al-Maghrib's Directive No. 2/G/2010, relating to the practice of stress tests and in order to strengthen the tools for measuring and assessing credit risk, stress tests were carried out in order to assess the degree of aversion of the FEC to this risk.

The results from the minimum stress tests within the meaning of that directive, incorporating potential changes in the composition of the FEC's portfolio, reflect the FEC's capacity to withstand credit risk. In all scenarios, the FEC displays a solvency ratio above the regulatory threshold and a non performing loans rate not exceeding 1%.

2.2 Asset / Liability Management

Asset/Liability Managers

ALM risk management is carried out within the Finance Division by the Management Control and ALM Department.

The ALCO Committee, chaired by the Governor, General Manager of the FEC, is in charge of the transversal and collegial monitoring of the financial risks to which the institution is exposed and for reviewing decisions that would affect the Asset/Liability Management.

Asset / Liability Management

The FEC has set up a mechanism for managing balance sheet risks such as liquidity, interest rate and exchange rate risks, so as to be able to continuously monitor their evolution according to the trend of the financial markets, and to the Bank's activity.

In order to preserve the Bank's financial balance, the ALM mechanism ensures :

- that there is a sufficient level of liquidity, enabling the Bank to meet its obligations at all times and protecting it from any crisis ;
- that the risk inherent in foreign exchange positions does not reduce the Bank's profit margin ;
- the stability of results against interest rate fluctuations, by preserving the interest margin and optimizing the economic value of equity capital ;
- to guide the Bank's refinancing strategy.

Liquidity risk

Liquidity risk is defined as the risk that the Bank will not be able to meet its commitments as they fall due under normal conditions.

The FEC may be exposed to liquidity risk which may take one of the following forms :

- the inability of the institution to raise the necessary funds to deal with unexpected short-term situations, including a significant drawdown of funding commitments given to TCs ;
- the failure to match assets and liabilities or the financing of medium- and long-term assets with short-term liabilities.

Used approach to calculate Liquidity Gaps :

The measurement of this risk is based on balance sheet items at a given closing date, classified according to their residual maturity, and to which the flow laws and the ALM conventions are applied. The static flow gap makes it possible to determine the surplus or requirement of resources in the medium to long term, assuming that there is no new production of assets and liabilities.

At December 31, 2021, the profile of liquidity gaps is as follows :

Interest Rate Risk Management (IRRM)

Interest rate risk corresponds to the sensitivity of the balance sheet to future interest rate movements. The assessment of this risk is carried out through a series of stress test simulations, in particular in the context of the following six regulatory scenarios :

- Scenario 1: Parallel shift of the interest rate curve upwards (+200 bps);
- Scenario 2: Parallel shift of the interest rate curve downwards (-200 bps);
- Scenario 3: Rise in short rates;
- Scenario 4: Falling short rates;
- Scenario 5: Flattening of the yield curve;
- Scenario 6: Steepening of the yield curve.

The analysis and assessment of interest rate risks follows a dual logic, namely the preservation of the interest margin and the economic value of equity capital.

The Bank has opted for the approach known as the static mode maturity method. This approach consists of liquidating all balance sheet positions in static mode according to their contractual or conventional characteristics.

Exposure as of December 31, 2021

The flow of interest rate gaps as of December 31, 2021 is as follows :

The impact of the regulatory scenarios is 8.40% on the forecast net interest margin and 8.78% on the economic value of capital equity.

Foreign exchange risk

In order to be immune to foreign exchange risk, the FEC has set up a perfect and complete hedging on the occasion of :

- the two drawdowns made in during the 2019 fiscal year on a line of credit contracted in 2018 with a foreign lender ;
- the 50 million euros drawdown made in 2021.

As a reminder, the foreign exchange risk coverage related to the majority of the external loans mobilized by the FEC during the 1990s is taken in charge by the State (Ministry of the Economy and Finance/Treasury and External Finance Division) for remuneration, within the framework of a system specific to each line of credit.

2.3 Operational Risks

Over the past few years and in accordance with the provisions of Bank Al-Maghrib and the principles of good governance, the FEC has put in place an evolving internal control system that allows to :

- ensure the reliability and integrity of the financial and accounting information produced ;
- ensure that operations are carried out in accordance with the laws and regulations in force and according to the management guidelines and standards defined by the Management Body and the Administrative Body ;
- prevent and control the risks associated with its activity through well-defined and regularly monitored procedures.

General Management supervises the operational risk management system and monitors the actions taken to strengthen it.

General framework

The FEC has undertaken several actions to strengthen the internal control system and the establishment of the necessary foundation for the construction of a robust and long-lasting operational risk management system backed by best practices and in compliance with regulatory requirements :

» Signature delegation mechanism

The FEC has set up an advanced signature delegation mechanism, based on a precise definition of powers and a clear delimitation of responsibilities. This mechanism meets the following principles :

- The principle of double signature is mandatory for all transactions affecting the accounts of the FEC or other elements of its assets;
- The separation between initiation and execution on the one hand, and control on the other ;
- The replacements are systematically scheduled in the event of the absence or impediment of a person in order to ensure continuity of service.

» General procedures manual

The FEC has a general procedures manual covering all the functional processes of the Steering, Business and Support domains. The general mapping of processes and procedures has been developed according to the requirements of the ISO 9001 V2008 Quality standard.

In addition, the integration of the MEGA process modeling tool has made it possible to have a single, structured procedure repository accessible by all FEC's employees through an intranet site. This repository is subject to regular evolutionary maintenance.

» Manual of procedures and accounting organization

The FEC has a manual of procedures and accounting organization to ensure that :

- all operations carried out by the FEC are faithfully translated into accounting records ;
- all records comply with the Chart of Accounts for Credit Institutions and the regulations in force ;
- all internal and external financial and accounting informations are reliable, complete and understandable for its users.

» Internal control manual

In accordance with the regulations in force and best practices in this area, the FEC has an internal control manual enabling it to ensure the regularity and proper application of the procedures put in place as well as the formalization of control points.

» Business Continuity Plan

In accordance with the provisions of the circular No. 4/W/2014 and the directive No. 47/G/2007 of Bank Al-Maghrib, the FEC has a Business Continuity Plan approved by the Board of Directors, allowing it to ensure, according to various crisis scenarios, the operation in degraded mode as well as the resumption of activities.

The implementation of the FEC's BCP focused in particular on the establishment of :

- Information System continuity mechanisms;
- Logistical continuity mechanisms;
- Human resources continuity mechanisms;
- Business continuity mechanisms.

In order to ensure the operational maintenance of the mechanisms put in place, the BCP documentation corpus [criticality study, continuity strategy, procedures, communication plan, etc.] is regularly updated and a maintenance and enhancement plan for the FEC's BCP is currently being developed.

» Triggering of the BCP following the pandemic crisis

Apart from the triggering of its pandemic crisis management mechanism in March 2020, and in the absence of any incident requiring its use, the FEC did not activate its BCP during the 2021 fiscal year.

However, and due to the persistence of the effects of the pandemic context, the FEC has ensured business continuity of operational and banking processes, in particular through the implementation of an appropriate pandemic disaster management plan.

Similarly, the FEC continued to ensure a permanent monitoring of the evolution of the health situation and of the preventive measures enacted by the public authorities. In this context, the FEC has carried out several awareness actions among its employees, regarding the strict respect of the preventive measures against Covid-19, advocated by the national health authorities, in order to consolidate the achievements made by the Kingdom in this area.

In this respect, the FEC has also adopted from 2020, the hybrid face-to-face/telework mode, and this, until February 2022, which marked the return to normal and face-to-face work for all employees, following the improvement of the health situation.

Operational risk management

The FEC has an operational risk map which was reconstructed in 2010 based on the Basel II typology and which is updated annually. This mapping covers the processes in the areas of credit, support and information systems and makes it possible to target the processes requiring special or reinforced monitoring.

The operational risk management system deployed at the FEC, as part of the Basel II reform and in application of Directive No. 29/G/2007 issued by Bank Al-Maghrib, allows the identification and assessment of operational risks as well as the follow-up of action plans adopted for the identified major risks. This system was supplemented in 2011 by an incident collection database, which provides an objective view of the risks incurred and the reassessment of these risks by the results of the collection of operational incidents.

The operational risk management system is fully automated following the deployment of an IS application, making it possible to ensure :

- The identification, assessment and monitoring of operational risks through risk mapping.
- The reconciliation of the risk mapping with the general procedures manual.
- Monitoring of action plans adopted for the major risks identified.
- The collection of incidents related to operational risks.

Organization

On the organizational side, the management of the operational risk management system is carried out by the Risk and Permanent Control Division. The latter is supported by operational risk correspondents (ORC) at the level of the Business and Support entities.

These ORCs are responsible for reporting operational incidents, analyzing the collection base for these incidents and implementing action plans to cover major risks.

To this end, a procedure for collecting and reporting operational incidents as well as a reporting form for the occurrence of an operational incident have been developed and made available to the ORCs in order to equip the collection and reporting process for incidents.

The governance of operational risks is ensured by the Internal Risk Committee.

Hedging of operational risks

In accordance with the regulatory provisions relating to minimum equity requirements, the FEC has been covering operational risks since December 2011.

The equity requirement to cover operational risks is calculated using the "basic indicator" approach, which is equal to 15% of the average net banking income, calculated over the past 3 years.

2.4 Risks of Non-Compliance

In accordance with Bank Al-Maghrib's Directive No. 49/G/2007 relating to the compliance function of August 31, 2007, the FEC has adopted a compliance and a charter policy.

RAPPORT GENERAL DES COMMISSAIRES AUX COMPTES EXERCICE DU 1^{ER} JANVIER AU 31 DECEMBRE 2021

Audit des états de Synthèse

Opinion

Conformément à la mission qui nous a été confiée par votre Conseil d'administration, nous avons effectué l'audit des états de synthèse ci-joints du FONDS D'EQUIPEMENT COMMUNAL, qui comprennent le bilan au 31 décembre 2021, le compte de produits et charges, l'état des soldes de gestion, le tableau des flux de trésorerie pour l'exercice clos à cette date, ainsi que l'état des informations complémentaires (ETIC). Ces états de synthèse font ressortir un montant de capitaux propres et assimilés de 5.322.666 KMAD, dont un bénéfice net de 328.481 KMAD.

Ces états ont été arrêtés par le Conseil d'Administration le 31 mai 2022, dans un contexte évolutif de la crise sanitaire de l'épidémie de Covid-19, sur la base des éléments disponibles à date.

Nous certifions que les états de synthèse cités au premier paragraphe ci-dessus sont réguliers et sincères et donnent, dans tous leurs aspects significatifs, une image fidèle du résultat des opérations de l'exercice écoulé ainsi que de la situation financière et du patrimoine du FONDS D'EQUIPEMENT COMMUNAL au 31 décembre 2021 conformément au référentiel comptable en vigueur au Maroc.

Fondement de l'opinion

Nous avons effectué notre audit selon les Normes de la Profession au Maroc. Les responsabilités qui nous incombent en vertu de ces normes sont plus amplement décrites dans la section « Responsabilités de l'auditeur à l'égard de l'audit des états de synthèse » du présent rapport. Nous sommes indépendants du fonds conformément aux règles de déontologie qui s'appliquent à l'audit des états de synthèse au Maroc et nous nous sommes acquittés des autres responsabilités déontologiques qui nous incombent selon ces règles. Nous estimons que les éléments probants que nous avons obtenus sont suffisants et appropriés pour fonder notre opinion d'audit.

Questions clés de l'audit

Les questions clés de l'audit sont les questions qui, selon notre jugement professionnel, ont été les plus importantes dans l'audit des états de synthèse de la période considérée. Ces questions ont été traitées dans le contexte de notre audit des états de synthèse pris dans leur ensemble et aux fins de la formation de notre opinion sur ceux-ci, et nous n'exprimons pas une opinion distincte sur ces questions.

Risque de crédit et provisionnement des crédits à la clientèle	
Risque identifié	Réponse d'audit
<p>Les crédits à la clientèle sont porteurs d'un risque de crédit qui expose le FONDS D'EQUIPEMENT COMMUNAL à une perte potentielle si les clients ou les contreparties s'avèrent incapables de faire face à leurs engagements financiers. Le Fonds constitue des provisions destinées à couvrir ce risque.</p> <p>Ces provisions sont estimées et comptabilisées en application des principes du Plan Comptable des Etablissements de Crédit (PCEC) et des dispositions de la circulaire 19/G/2002 de Bank Al Maghrib relative à la classification des créances et à leur couverture par les provisions.</p> <p>L'évaluation des provisions en couverture des créances sur la clientèle requiert :</p> <ul style="list-style-type: none"> - L'identification des créances en souffrance ; - L'évaluation du montant des provisions en fonction des différentes catégories de classification des créances du Fonds. <p>Les informations concernant les règles de classification et de provisionnement des créances sont présentées dans l'état « Principales méthodes comptables » de l'Etat des Informations Complémentaires (ETIC).</p> <p>Au 31 décembre 2021, le montant des provisions pour dépréciation s'élève à 6 MMAD; il ramène les créances à la clientèle à un montant net de 26.183 MMAD.</p> <p>Nous avons considéré que l'appréciation du risque de crédit relatif aux créances sur la clientèle et l'évaluation des provisions y afférentes constituaient un point clé de l'audit, ces éléments étant de montants significatifs et faisant appel aux estimations de la direction.</p>	<p>Nous avons pris connaissance du dispositif de contrôle interne du FONDS D'EQUIPEMENT COMMUNAL et des contrôles clés relatifs à la classification des créances et à l'évaluation des provisions y afférentes.</p> <p>Nos travaux d'audit ont principalement consisté à :</p> <ul style="list-style-type: none"> - Étudier la conformité au PCEC et notamment à la circulaire 19/G/2002 de Bank Al Maghrib des principes mis en œuvre par le Fonds, en termes de règles de déclassement et de provisionnement de créances ; - Examiner le dispositif de gouvernance et tester les contrôles clés mis en place au niveau du Fonds ; - Tester par sondage la correcte classification des créances dans les catégories appropriées ; - Tester la provision déterminée sur une sélection de créances en souffrance.

Responsabilité de la Direction et des responsables de la Gouvernance à l'égard des états de synthèse

La direction est responsable de la préparation et de la présentation fidèle des états de synthèse, conformément au référentiel comptable en vigueur au Maroc, ainsi que du contrôle interne qu'elle considère comme nécessaire pour permettre la préparation d'états de synthèse exempts d'anomalies significatives, que celles-ci résultent de fraudes ou d'erreurs.

Lors de la préparation des états de synthèse, c'est à la direction qu'il incombe d'évaluer la capacité du fonds à poursuivre son exploitation, de communiquer, le cas échéant, les questions se rapportant à la continuité de l'exploitation et d'appliquer le principe comptable de continuité d'exploitation, sauf si la direction a l'intention de liquider le fonds ou de cesser son activité ou si aucune autre solution réaliste ne s'offre à elle.

Il incombe aux responsables de la gouvernance de surveiller le processus d'information financière du fonds.

Responsabilité de l'Auditeur à l'égard de l'audit des états de synthèse

Nos objectifs sont d'obtenir l'assurance raisonnable que les états de synthèse pris dans leur ensemble sont exempts d'anomalies significatives, que celles-ci résultent de fraudes ou d'erreurs et de délivrer un rapport de l'auditeur contenant notre opinion.

L'assurance raisonnable correspond à un niveau élevé d'assurance, qui ne garantit toutefois pas qu'un audit réalisé conformément aux normes de la profession au Maroc permettra toujours de détecter toute anomalie significative qui pourrait exister. Les anomalies peuvent résulter de fraudes ou d'erreurs et elles sont considérées comme significatives lorsqu'il est raisonnable de s'attendre à ce que, individuellement ou collectivement, elles puissent influencer sur les décisions économiques que les utilisateurs des états de synthèse prennent en se fondant sur ceux-ci.

Dans le cadre d'un audit réalisé conformément aux normes de la profession au Maroc, nous exerçons notre jugement professionnel et faisons preuve d'esprit critique tout au long de cet audit. En outre :

- Nous identifions et évaluons les risques que les états de synthèse comportent des anomalies significatives, que celles-ci résultent de fraudes ou d'erreurs, concevons et mettons en œuvre des procédures d'audit en réponse à ces risques, et réunissons des éléments probants suffisants et appropriés pour fonder notre opinion. Le risque de non-détection d'une anomalie significative résultant d'une fraude est plus élevé que celui d'une anomalie significative résultant d'une erreur, car la fraude peut impliquer la collusion, la falsification, les omissions volontaires, les fausses déclarations ou le contournement du contrôle interne ;
- Nous acquérons une compréhension des éléments du contrôle interne pertinents pour l'audit afin de concevoir des procédures d'audit appropriées aux circonstances, et non dans le but d'exprimer une opinion sur l'efficacité du contrôle interne du Fonds ;
- Nous apprécions le caractère approprié des méthodes comptables retenues et le caractère raisonnable des estimations comptables faites par la Direction, de même que des informations y afférentes fournies par cette dernière ;

- Nous tirons une conclusion quant au caractère approprié de l'utilisation par la Direction du principe comptable de continuité d'exploitation et, selon les éléments probants obtenus, quant à l'existence ou non d'une incertitude significative liée à des événements ou situations susceptibles de jeter un doute important sur la capacité du Fonds à poursuivre son exploitation. Si nous concluons à l'existence d'une incertitude significative, nous sommes tenus d'attirer l'attention des lecteurs de notre rapport sur les informations fournies dans les états de synthèse au sujet de cette incertitude ou, si ces informations ne sont pas adéquates, d'exprimer une opinion modifiée. Nos conclusions s'appuient sur les éléments probants obtenus jusqu'à la date de notre rapport. Des événements ou situations futurs pourraient par ailleurs amener le fonds à cesser son exploitation ;
- Nous évaluons la présentation d'ensemble, la structure et le contenu des états de synthèse, y compris les informations fournies dans l'ETIC, et apprécions si les états de synthèse représentent les opérations et événements sous-jacents d'une manière propre à donner une image fidèle.

Nous communiquons aux responsables de la gouvernance notamment l'étendue et le calendrier prévus des travaux d'audit et nos constatations importantes, y compris toute déficience importante du contrôle interne que nous aurions relevée au cours de notre audit.
